WORK EXPERIENCE

Dental Buddy | Remote
Frontend Developer Intern
July 2024 - Present

- As a Frontend Developer Intern, I gained valuable experience and performed various tasks that contributed to my growth and development in my field. Collaborated with designers and backend developers to implement frontend solutions that align with product requirements.
- Implemented API calls, seamlessly integrating real-time data retrieval and updates into the application's core functionality.
- Handled multiple dashboards (authorization) like Admin, Compliance , Practice Owner ,Staff , etc..

Codemevel | Remote
Full Stack Developer Intern
May 2024 – Oct 2024

- Led the solo charge in developing the projects using Next.js, Shadcn UI , Postgress and server actions .
- Made multilingual websites using i18n routes in NextJs.
- Used Dynamic Routing techniques and query parameter-driven API calls.
- Enabled persistent user sessions via local storage and tokens, resulting in a significant 60% decrease in login frequency while improving user satisfaction.

SKILLS

- **Languages & Frameworks**: C++, JavaScript, Typescript, Next.js, React, Redux, SASS, Node.js , Express.js ,Tailwind, Tanstack query.
- **Tools & Technologies**: VS Code, GitHub, Prisma ORM, Payment-Integration , Postgresql , MongoDB, Firebase, MySQL , Figma , MUI, Shadcn UI, Chart.js , Strapi , GraphQL

EDUCATION

JSS Academy of Technical Education , Noida
BTech in Computer Science & Engineering
Nov 2021 - July 2025 | Noida, India | CGPA : 8.4 / 10

St. Fidelis Sr. Sec School , Aligarh
Intermediate – 2019-2020 | percentage: 92%

TECHNICAL PROJECTS

REVERENT-STORE Aug 2024 - Present

- Built a full-stack e-commerce website using Next.js, Prisma ORM, Postgresql, tailwind, typescript implementing key features such as product listing, filtering, cart management , Wishlist ,pagination and PayPal payment integration for seamless transactions.
- Developed an admin dashboard for managing Products, Orders , Payments ,Investors, Help Tickets , Users ,Employees , etc.
- Integrated theme and language toggle functionalities.

OYO-Hotels! Apr 2024

- OYO clone website, powered by NextJS, MongoDB! and tailwind . Designed to revolutionize the accommodation booking experience as our platform offers a seamless blend of user-friendly interface and robust backend functionality.
- Facilitating seamless transactions, our integrated payment gateway supports various payment methods.
- Used Dynamic Routing techniques and query parameter-driven API calls.

Sorting-Visualizer Sep 2024

- Developed an algorithm-based web application using Next.js and Tailwind CSS to visualize all possible sorting techniques.
- Implemented dynamic, color-based visual representations that adjust based on algorithm complexity, array size, and sorting condition.
- Enabled real-time performance visualization, enhancing understanding of sorting processes through interactive and responsive UI.

Solvo-Mate Feb 2024 – Mar 2024

- It is a dynamic and immersive blog platform build using power of Next.js and GraphQL rich-text editor to bring you a seamless browsing experience, whether you're a seasoned developer, a curious learner, a passionate photographer, or a sports enthusiast.
- Intuitive user interface ensures smooth navigation, allowing you to easily discover and access the content that interests you most. With fast-loading pages and a responsive design, you can enjoy an optimal reading experience across devices.
